British Standard Kitemark BS 10125:2014+A1:2016 Information

Statement of Commitment:

This document certifies Rotec Industries' commitment to support current recognized quality standards in vehicle damage repair processes and to supply its products under BS 10125:2014+A1:2016 Standards of Quality and in Compliance with British Standards 10125 Sections 2.3 (3.2.1 Certificates of Product Knowledge and Competency), (3.5.2.1 Product Shelf lives easily visible)

Quality Control and Production Standards:

All Rotec Industries products are Warranted and Manufactured under strict Quality Standards ISO 37, ISO9001 and TUV Standards, to Match OEM Quality and Performance Standards.

Product Compatibility:

Rotec Industries products are designed to comply with the applicable technical specification OEM Standards. Rotec products are chosen as an aftermarket repair solution for industry requirements by many Technical Departments.

Specifications for Vehicle Damage Repair Processes:

Rotec Industries provides easy to understand and accessible Products Specification Sheets on line at www.rotecindustries.com these can be downloaded and included in each Repair Process Documentation to comply with 3.3.2 and 3.5.

Product Supply Handling and Storage:

To comply with 3.3.2. Rotec Industries products are designed to be stored in HSE compliant cabinets and are supplied with prominently displayed use by dates that can be inspected and read whilst "stored on the shelf" to help all involved in the repair process to ensure that use by dates are strictly adhered to.

Certification of Product Knowledge and Operative Competency:

In line with 3.2.1. Rotec Industries will provide certified product orientation and application courses for all applicable products supplied. These will ensure that all operatives understand the specification, use and tolerances of each product, and will ensure full competence to be able to achieve the desired assessable outcome.

Together we can "make excellence a habit"
